Professional Summary

B.Tech CSBS student with a 9.52/10 CGPA, specializing in AI/ML and Computer Vision. Hands-on experience in deep learning, image classification, explainable AI, data analytics, predictive modeling, and software development. Proficient in Python, ML, Computer Vision, SQL, and Power BI, with experience developing practical AI and data-driven solutions. Seeking an AI/ML or Computer Vision Internship to contribute to real-world intelligent solutions.

Technical Skills

Programming: C, C++, Python

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS

Databases: MongoDB, SQL

Data Analytics: Data Cleaning, EDA, Data Visualization, Statistical Analysis, Predictive Modelling, Power BI, SQL, Pandas, NumPy

AI & Machine Learning: Machine Learning, Deep Learning, CNN, Computer Vision, NLP, LLMs, Explainable AI (XAI)

Computer Vision: Image Classification, MRI Image Analysis, CNN-based Applications, Grad-CAM, Model Interpretability

Tools: Git, GitHub, Visual Studio Code, Microsoft Office Suite, Prompt Engineering, Jupyter Notebook, Power BI, Tableau

Education

St. Vincent Pallotti College of Engineering and Technology

Aug 2023 – Present

B.Tech, Computer Science and Business Systems; CGPA: **9.52/10**

GATE 2025 – Appeared

Work Experience

BISMI TECHNOLOGY INDIA PRIVATE LIMITED

June 2026 – Present

Website Developer & Freelancer (Intern)

- Spearheaded end-to-end development of dynamic, client-centric web solutions using React.js and modern web technologies, independently managing full project lifecycles from requirement gathering to seamless deployment.

Incubein Foundation, RTMNU (Intern)

June 2026 – Present

- Contributed to high-impact academic research and technical projects in collaboration with faculty, gaining invaluable exposure to institutional-level work flows and professional research methodologies.

EDUNET AICTE – AI & Machine Learning (Intern)

January 2026

- Engineered and evaluated robust ML models on real-world datasets through intensive hands-on training, mastering the complete AI/ML pipeline from data preprocessing to deployment-ready solutions.

Eduskill – Data Analytics & Power BI (Intern)

March 2026

- Architected interactive Power BI dashboards and end-to-end reporting pipelines that transformed complex raw datasets into compelling, actionable business intelligence for strategic decision-making.

Eduskill – Machine Learning & Data Science (Intern)

April 2026

- Implemented advanced ML algorithms — spanning regression, classification, and clustering — applying rigorous data science workflows including feature engineering and performance optimization on structured datasets. Projects

Projects

NeuroAssist AI – Explainable Alzheimer's Detection System

June 2026 – Present

- Built a Computer Vision and Deep Learning-based MRI image classification system for early Alzheimer's detection, applying Grad-CAM Explainable AI to improve model interpretability and support clinical decision-making.

Smart Campus Complaint System

June 2026

- Engineered a full-stack MERN platform with JWT authentication, real-time complaint tracking, centralized management, and an administrative dashboard.

Legislate AI

Jan 2026

- Built an AI-powered legal information platform designed to simplify complex legislation and improve information accessibility.

EcoHabit Project

Apr 2026

- Developed a gamified sustainability tracker for monitoring and encouraging eco-friendly daily habits.

Leadership & Activities

Documentation & Registration Head (2025)

Led Enspire 2.0 Ignite, managing end-to-end documentation and participant registration.

IAENG Membership (2026)

Active member of the International Association of Engineers (IAENG), engaging with a global community of engineering and technology professionals.

Kaggle Competition – Participation & Achievement (2026)

Secured a score of 94.93% among 2,260 participants and 2,186 teams.

Awards & Achievements

1st Runner-Up – Sandbox Hackathon (2026)

Ranked in the Top 20 Teams – Smart India Hackathon (SIH)

Certifications

- NPTEL – 4 Certified Courses (Passed Examinations with Silver Medal)
- Infosys Springboard – Software Testing, Artificial Intelligence and Machine Learning
- Skill India – Finance For All
- Microsoft Nirmaan– AI & ML
